

1. Purpose

The purpose of this policy is to establish clear office timing and shift structures to support Tntra's global client engagement across different time zones while maintaining operational discipline, productivity, and statutory compliance.

This policy defines applicable shift timings, attendance tracking requirements, and governance mechanisms for employees working across different client geographies.

2. Scope

This policy applies to **all employees of Tntra India**.

While the **standard office shift remains the IN/MENA shift**, certain employees may be assigned alternative shifts based on recurring client engagement requirements.

3. Applicable Shift Timings

The following shifts may be assigned depending on client requirements:

Shift Code	Shift	Timing
T1	IN / MENA Shift (Standard Shift)	10:00 am – 7:00 pm IST
T2	EMEA & NA Shift	3:00 pm – 12:00 am IST
T3	AU Shift	7:00 am – 4:00 pm IST

Each shift will follow a **9-hour office duration**, which includes **8 working hours and a 1-hour break**. The defined shift duration includes the working hours and break time only. **Employee travel time to and from the office will not be considered part of working hours.**

4. Eligibility

Shift applicability is limited to employees who have **recurring client meetings outside the standard IN/MENA shift**.

Shift allocation will be recommended by the **Reporting Manager / Delivery Head / PMO** and confirmed by **People Management**.

5. Shift Stability

To ensure operational stability and avoid frequent disruptions:

- Shift allocation will be **locked for the entire calendar month**.
- **No mid-cycle shift changes** will be permitted unless approved jointly by **David (Global CTO) and Milin (Head – People Management)**.
- Upon completion of a **UK or AU shift month**, the employee will revert to the **standard IN shift (10:00 am – 7:00 pm)** in the subsequent month, as far as operationally feasible.

- Direct rotation between **AU and UK shifts in consecutive months** will be avoided wherever possible.

This approach ensures **predictability, productivity stability, and reduced fatigue caused by frequent shift changes.**

6. Hybrid Work Structure

AU Shift (7:00 am – 4:00 pm IST)

- Employees may begin work **from home between 7:00 am – 11:00 am.**
- Post **11:00 am**, employees may report to the office.

EMEA & NA Shift (3:00 pm – 12:00 am IST)

- Employees may work **from office until 6:30 pm – 7:00 pm.**
- Post **7:00 pm**, work must be continued **from home.**

Any request for **full-month permanent Work From Home during shift months** must receive prior approval from the **Global CTO.**

Reporting Managers must seek CTO approval before confirming any permanent WFH arrangement.

7. Attendance & Time Tracking

Office Attendance

While working from the office in any shift, employees are **required to use their ID card to enter and exit the office premises.**

The entry and exit through the **ID card access system will mark the employee's attendance.**

Work From Home Attendance

When working from home, employees must record their attendance using the **HRStop portal** by using the **“Time In” and “Time Out” buttons.**

Hybrid Workdays (Office + Home)

On days when employees work partly from home and partly from the office, the following attendance process must be followed:

- 1.**Punch In (HR Portal)** when starting work from home
- 2.**Punch Out (HR Portal)** when leaving home
- 3.**ID Card Entry** when entering the office
- 4.**ID Card Exit** when leaving the office

Similar attendance discipline applies for employees working **office hours before transitioning to work from home in the EMEA/NA shift.**

All attendance must be **accurately recorded and maintained through HRStop and the office access system.**

In case of a **missed punch**, employees must raise a **Punch Correction Request through the HR Portal**.

8. Working Days

This shift structure applies **Monday to Friday only**.

Weekends (Saturday and Sunday) remain **non-working days**, unless work is specifically approved by the Reporting Manager and business needs require it.

9. Compensation Structure

The shift structure is designed to support global client delivery.

No additional shift allowance or compensatory off will be applicable, as the shift hours remain within the standard working hour framework.

10. Manager Responsibility

Reporting Managers and Delivery Heads are responsible for ensuring that employees assigned to their teams adhere to the defined shift timings, attendance processes, and work structure outlined in this policy.

Managers must ensure:

- Proper shift allocation based on client requirements
- Compliance with attendance and punch-in procedures
- Proper planning of hybrid work transitions
- Timely escalation of any deviations from the defined shift structure

Managers are also responsible for coordinating with **People Management** for any required approvals related to shift changes or work structure exceptions.

11. Governance & Review

This policy is designed to:

- Support **global client delivery across time zones**
- Maintain **statutory and operational compliance**
- Ensure **productivity continuity**
- Prevent **unstructured shift fluctuations**
- Maintain **cost discipline**

People Management, along with Delivery Leadership, will periodically review the effectiveness of this structure and recommend adjustments if required.
